

## Ring Sizing

Below is a ring size conversion table to help you find your perfect ring size here at Seraphiye. We use the USA number system for our rings because we think it's the simplest, but if you are more familiar with a different sizing system, this table will help you.

UK Size	USA Size	EU Size	Inside Circumference	Inside Diameter
J	5	48	49 mm	15.6 mm
K	5.5	50	50.3 mm	16.0 mm
L	6	51	51.5 mm	16.4 mm
M	6.5	53	52.8 mm	16.8 mm
N	7	54	54 mm	17.2 mm
O	7.5	55	55.3 mm	17.6 mm
P	8	57	56.7 mm	18.0 mm
Q	8.5	58	58 mm	18.4 mm
R	9	59	59.4 mm	18.8 mm

If you're not sure of your ring size, then the simplest way is to use a ring that you know fits comfortably and refer to our conversion table to check it's inside diameter.

If you don't have a ring handy then cut a narrow piece of paper (paper won't stretch like string might), or woven ribbon, and wrap it comfortably around your ring finger. Use a pen to mark the place where the paper or ribbon meets, and then measure the length and compare on our chart.

Our hands and fingers change size throughout the day, depending on many things, for example temperature, diet, even whether we've been stood up or sat down, so it's best to measure your finger a few times through the day and use an average (just make sure it's always the same finger!).

## Necklace and Chain Lengths

Most of our chains and necklaces are adjustable by up to 2 inches, such as our most popular length 16-18", or 18-20", which makes them super-versatile.

Below is a rough guide to how the different chain lengths will work.

14 inches will usually sit at a choker length.

16 inches usually rests in the throat hollow.

18 inches is slightly longer, and can easily be worn over clothing, such as roll necks.

20 inches sits at a longer length and is perfect for statement pieces, or when wearing a lower neckline.

22, 24 inches is a great length to use when layering pieces for the evening, or to wear over swimwear.
